

MONITORING & TARGETING SERVICES AND SOLUTIONS

Energy Monitoring and Targeting plays a big part in understanding a building's energy performance, helping to identify areas that can be improved.

Matrix Energy Solutions provides all levels of energy monitoring and targeting to any organisation no matter the size or type. Services include manual and remote monitoring and targeting, as well as remote energy control. Valuable Human resource time is saved where this process can be automated allowing remedial actions to be carried out quickly and effectively.

Manual Energy Monitoring and Targeting can be provided with the use of regular meter readings, targets can be set as well as allowing ongoing monitoring to ensure these are fulfilled and identifies any potential problems.

Automated Monitoring and Targeting can be provided using the Erbis 6 software package. This leading European product is exclusive to Matrix in the UK and provides real-time energy information and comprehensive energy analysis and reporting.

Remote Energy Control uses the data provided by automatic monitoring and targeting to proactively reduce energy consumption by making remote Building Management System adjustments from the Remote Energy Bureau.

Matrix aM&T software provides a fully automated web-based solution to Monitoring and Targeting that uses existing BMS infrastructure to present energy consumption data, in real time, both graphically and in report format. Alerts for excess consumption can be quickly sent via email or mobile phones so that action can be taken before the financial impact is felt.

Benefits

- Reduce energy costs
- Pinpoint existing issues
- Maximise valuable human resources
- 24 hour monitoring
- Immediate action
